

HONEYWELL MAINTENANCE SERVICE PLAN

It's time to protect your investment

MSP Avionics (MSPA) is a maintenance program that covers the Honeywell avionics suite on business aircraft and commercial helicopters.

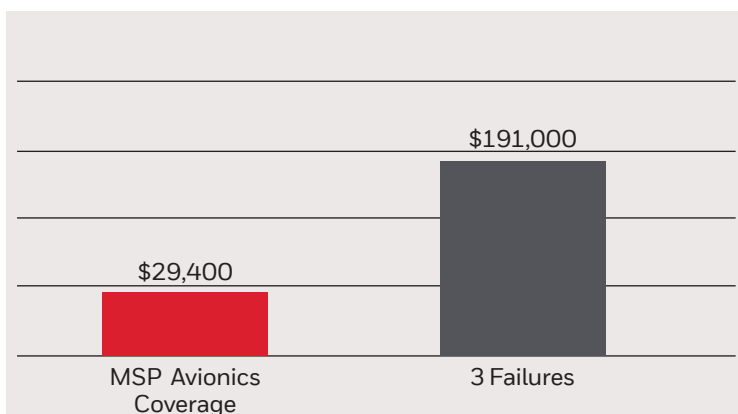

The program is exchange-based, which means Honeywell provides a functional unit in exchange for the failed item with repair support as an alternate option. The program allows operators to protect their investment, forecast annual maintenance budgets and take advantage of special MSP-specific upgrade options.

MAINTENANCE SERVICE PLAN – AVIONICS

Your avionics are a big investment -an investment — an investment worth protecting from the unexpected.. Designed for both fixed and rotary-wing aircraft, the Maintenance Service Plan - Avionics is an extended coverage warranty program for Honeywell avionics. Because the unexpected does happen.
